

Apeeon 6.x for PowerBuilder

A Breath of Fresh Air for Effective IT Investment

Apeeon 6.x for PowerBuilder (6.0/6.1/6.2) is the most powerful and flexible version to date. It enables you to develop and deploy extremely rich PowerBuilder applications to both .NET and Java platforms. There is no easier or faster approach to develop robust user-friendly business applications.

* Features only available in Apeeon version 6.2 Build 0097 or above.

Enhanced PowerBuilder Support

- ▶ **Updated PowerBuilder Foundation Classes (PFC) support.** The PFC version compatible with PowerBuilder 11.5 is now supported. Simply modify several lines of PowerScript and enjoy the robust PFC support.
- ▶ **Extensive UI control support.** All UI controls are now supported, enabling developers to create rich and user-friendly GUIs for their Web applications. MonthCalendar and DatePicker are new to this version.
- ▶ **PowerBuilder 11.5 and PB.NET support.** Also backwards compatible with PowerBuilder 8.x, 9.x, 10.x, and 11.x.
- ▶ **Improved toolbar support.** ToolbarText property; updated PowerBuilder 11.5 icons.
- ▶ **PowerBuilder NVOs for EAServer 6.x** can now be automatically deployed by the Apeeon Packaging Wizard.
- ▶ **Improved DataWindow support** - Decimal retrieval argument; CopyRTF/PasteRTF/InsertDocument functions.
- ▶ **Improved Printing support.***
 - DataWindow can be saved as PDF without installing any PDF printer at the client.
 - Printer page size/width/length can be customized by defining in the PB painter.

Fresh New Look for the Web

- ▶ **Windows Aero presentation style** is automatically applied to all system controls (except DatePicker and RichTextEdit), all DataWindows (except RichText), as well as Windows, Menus and Toolbars on Vista OS.
- ▶ **Windows XP presentation style** is automatically applied to all system controls (except DatePicker and Rich TextEdit), all DataWindows (except RichText), as well as Windows, Menus and Toolbars on XP OS.
- ▶ **Updated Apeeon demo application** (XMI demo) illustrates fresh new look achievable with PowerBuilder and Apeeon regardless of operating system version.

Build .NET-based Web Applications

Aligned with PowerBuilder's .NET support, you can now...

- ▶ **Build new .NET-based Web applications** with the most robust PowerBuilder features support on the Web.
- ▶ **Rapidly convert your existing PB applications** (up to 500 MBs) to the Web and .NET platform.
- ▶ **Maintain one set of code for three deployment models** - WinForm, WebForm, and Java Web, with no extra effort.
- ▶ **Applications deployed to .NET** with Apeeon will benefit from improved runtime performance by as much as 20%. Apeeon uniquely delivers the performance of Client/Server and the scalability of the Web, keeping your users happy and productive.

Enhanced Productivity for Developers

- ▶ **Deploy to Java & .NET with a single application profile.**
Appeon Developer allows you to deploy your PB application to both .NET and Java platforms using the same set of PBLs and the same Appeon Web application profile.
- ▶ **Prioritize unsupported features based on importance.**
Any unsupported features found (if any) are automatically prioritized by Appeon based on the importance of modifying them. As such, you can focus your energy on the most important unsupported features first to produce more meaningful results even faster.

Enhanced Platform Support

- ▶ **Operating Systems** - Windows Vista/XP (64-bit or 32-bit), Windows Server 2008/2003 (64-bit or 32-bit), Red Hat Enterprise Linux 5.0/4.0, IBM AIX 5.3/5.2, HP Unix 11.X/10.x, and Sun Solaris 10/9.
- ▶ **Java and .NET Application Servers** - Microsoft IIS 7.0/6.0 (with .NET Framework 3.0/2.0), Sybase EAServer 6.2/5.X, Oracle WebLogic 10.3/9.X/8.X, IBM WebSphere 7.0/6.1/5.1, and TmaxSoft JEUS 6.0/5.0.
- ▶ **Databases** - Sybase ASA 11.0/10.0/9.0/8.0/7.0, Sybase ASE 15.0/12.5, Sybase IQ 12.7, Microsoft SQL Server 2008/2005/2000, Oracle 11g/10g/9i/8i, IBM DB2 9.5/8.2, and Informix 9/7.
- ▶ **LDAPS protocol supported for LDAP servers** (on Windows operating system).

Deploy Java-based Web Applications to Linux

- ▶ **Supports deploying to Red Hat Enterprise Linux.** Your organization can take advantage of all the benefits that the Linux open-source operating system has to offer, including improved security, reliability, scalability, as well as lower cost of ownership.

A Breeze to Maintain

- ▶ **Appeon ActiveX plug-in** can be silently installed and available as .MSI file.
- ▶ **Web application deployment location** can be customized to meet your corporate standards.
- ▶ **.NET/COM components** can be automatically deployed through Appeon Developer.
- ▶ **INI files can be modified directly on the Appeon Server** without re-deploying the application.
- ▶ **Check for newer versions of Appeon** from inside PowerBuilder at the click of a button.
- ▶ **Appeon ActiveX plug-in** can be installed by a non-Administrator user on Internet Explorer 8 (for Vista and Windows 7 only). *
- ▶ **Connection cache of Appeon Server** can be switched on/off for more flexibility in your application design (for .NET only). *
