

PowerBuilder 2017 Datasheet

Build Faster, Better, Business Apps

INNOVATIVE FEATURES

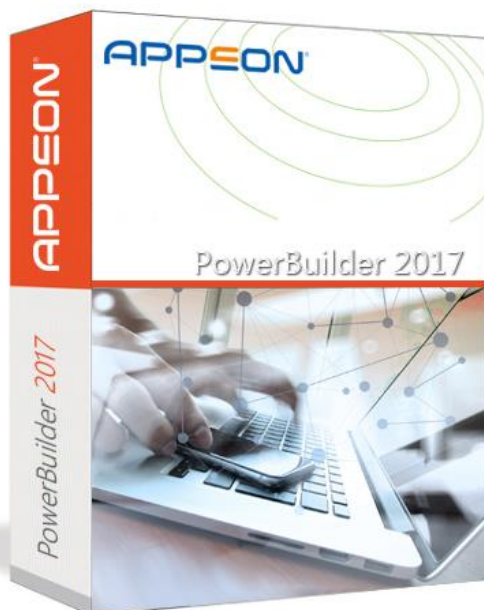

The new PowerBuilder roadmap keeps what you love and adds proven technology standards. Your projects will benefit from core desktop enhancements, improved productivity, n-tier app architecture, and .NET interop.

DELIVERED YEARLY

The new innovative features of PowerBuilder are delivered to you in agile yearly cycles, which will allow you to keep your apps up-to-date. But upgrades are never forced onto you.

AT A NEW LOW PRICE

PowerBuilder 2017 licenses are sold on a subscription basis. This eliminates the purchase of an expensive perpetual license, ensures you are never denied an upgrade, and allows you to flexibly adjust your team size.

- **Compliance.** Remain eligible to receive tech support, keep your production apps running smoothly, and comply with corporate policies.
- **Windows 10 & Updated DB Drivers.** Take advantage of these new OS and database versions without risk or headaches.
- **New Desktop Features.** Enhance your existing apps with native PDF, dockable windows, OData, and 64-bit executables.
- **New Mobile Target.** Leverage existing skills and code assets to rapidly develop cross-OS mobile apps with native mobile functionality powered by Apache Cordova.

This new major release of PowerBuilder was designed with ease of upgradeability in mind for existing SAP customers. It is the first new installment of PowerBuilder by AppEon since it entered into agreement with SAP in July 2016 to move your apps forward into the future.

The traditional desktop target was intentionally enhanced only with absolutely critical new features to ensure that you can quickly and reliably switch off PowerBuilder 12.x before that version is discontinued.

Both in terms of security and cost of ownership, Windows 10 and Windows Server 2016 offers benefits compared to its predecessors. PowerBuilder 2017 is the only version that is compatible with these new versions. In addition, updated database drivers are supported.

Depending on which version of PowerBuilder you are upgrading from, you can enrich your desktop apps with more new features than those listed. Most customers should at least benefit from native PDF generation, dockable windows, OData, and 64-bit executables.

A revolutionary new mobile target is introduced. Most PowerBuilder functionality and Apache Cordova plugins are supported. A single mobile project universally deploys to both iOS and Android.

Managing your licenses is easier than ever with our new cloud licensing service. Using PowerBuilder is as simple as logging into a Website, and perfect for virtualized environments or telecommuters. Of course, you can still use traditional license files if you prefer.

STANDARD EDITION

USD 695 per developer per year

This is virtually similar to the previous Enterprise Edition, with the exception of .NET Web Services and Assemblies targets. Great for developing traditional desktop apps.

CLOUD EDITION

USD 995 per developer per year

Ideal for customers that want to take advantage of Web APIs, share business logic among apps, and simplify deployment to the desktop with an n-tier Internet architecture.

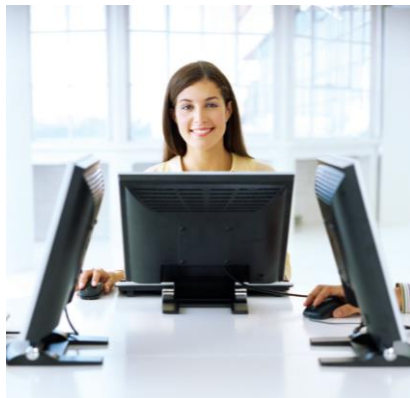

UNIVERSAL EDITION

USD 1595 per developer per year

Ideal for customers that want their business apps and data to be accessible on practically any device and OS, and powered by an n-tier Internet architecture.

Pricing and Availability

PowerBuilder 2017 is sold as a subscription, which includes a non-perpetual license for the software, access to upgrades, and standard technical support. Regardless you have an active support plan with SAP or are still using a very old version of PowerBuilder, you may upgrade by simply purchasing a subscription of PowerBuilder 2017.

PowerBuilder 2017 is offered in three new editions – Standard, Cloud, and Universal – so you can benefit from the features you really need at the lowest possible price. You may upgrade your subscription to a higher edition or add additional subscriptions at any time.

PowerBuilder 2017 is scheduled to release in Q2 2017. You may pre-order your subscriptions ahead of time at a significant discount, and we guarantee* to ship you the software no later than June 30, 2017.

* If Appeon is unable to fulfill your pre-order of PowerBuilder 2017 by June 30, 2017, you may request a full refund for fees paid to Appeon. Once a refund is issued, your order will be cancelled and you will no longer be eligible to receive the pre-order pricing on future purchases of PowerBuilder.

System Requirements

- **Desktop.** Windows 7-10 and Windows Server 2008-2016 (32-bit or 64-bit).
- **Mobile.** iOS 9.x or 10.x and Android 5.x or 6.x. Please refer to product manuals for certified devices.
- **Server.** Microsoft IIS 7-10 on Windows Server 2008-2016 with .NET 4.x framework (32-bit or 64-bit).
- **Database.** ADO.NET, Native, and ODBC interfaces for accessing most leading databases and versions. Please refer to product manuals for details.
