

PowerServer Tutorial

Pre-requisites PowerServer Mobile tutorial

1. Windows10 64bit VM with Microsoft Internet Information Service (IIS) enabled
2. A Database with working ODBC or native interface. Preferably SAP Sql Anywhere 16.0 (download from [here](#)), so that PowerBuilder and PowerServer can create sample DBs during installation.

3. PB 2017 R3 Universal (licensed copy or a trial from <https://www.appeon.com/freetrial?product=pb>)
4. Open <http://localhost> and check you get the IIS welcome page
5. Open <http://localhost/AEM> and check you get the PowerServer welcome page

6. iOS or Android device able to connect to the MS IIS welcome page running on the Windows10 VM. Start Safari (iOS) or Chrome (Android) mobile web browser and open the page <http://VM-ipaddress>. Disable or modify the Windows Firewall if needed
